Asset Integrity Services for the onshore and offshore Oil & Gas, Petrochemical, Refinery, Chemical, Fertilizer and Power industries

- Integrity Assessment and Audit for Plant Facilities
- Inspection Planning for Plant Facilities
- Inspection of Pressure Vessels, Storage tanks and Piping
- Inspection of various types of Industrial Boilers
- Risk Based Inspection (RBI) Consultancy
- Remnant Life Assessment
- Fitness For Service Assessment as per API 579-1 / ASME FFS-1
- Failure Investigation Studies / Assessment
- Repair Procedures Development & Implementation
- Pipeline Integrity & Risk Assessment
- Pipeline Integrity Consultancy at the Project Design stage
- Design of Integrity Management System for Pipelines
- Integrity Systems and Procedures Development
- Review & Provide Expert consultancy on Company Integrity programs
- NDE Procedures Development & NDT Level III Consultancy
- Welding Procedures Qualification Consultancy
- Process Safety Management Consultancy & Auditing
- Specialized Plant Inspection Manpower Supply
Corrosion Control Services for the onshore and offshore Oil & Gas, Petrochemical, Refinery, Chemical, Fertilizer and Power Industries

- Material Selection and Metallurgical Review
- Design review for Corrosion Control during Design / Project phase
- Review of Corrosion Management Systems
- Internal and External Corrosion Failure Analysis
- Design Stage Degradation Modelling
- Design, Construction & Commissioning of SACP and ICCP Systems
- CP Interference Survey (DC/AC) & Mitigation Solutions
- CIPS & DCVG / ACVG Survey, Review and Submission of Expert Report
- Soil Survey / Pre-design Feasibility Studies for CP Systems
- Pipeline Internal & External Corrosion Control Solutions
- Witness for Commissioning of Internal Corrosion Control Packages
- Coating Condition Survey / Coating Inspection
- Expert Consultancy on Coating System and Application methods
- Preparation of Company Technical Coating Specification
- Preparation of CP and Chemical Treatment Specification
- Technical Consultancy on the type of ILI tools as per Specific threats with Pipeline
Technical Training programs to the corporates as in-house training programs from Fresher to Executive level.

- Training on Codes and Standards as per client requirement
- API 510 Pressure Vessel Inspector Training program
- API 570 Piping Inspector Training program
- API 653 Storage Tank Inspector Training program
- API 579-1 / ASME FFS-1 Fitness for Service Training program
- API 580 / 581 Risk Based Inspection Training program
- API 571 Materials & Corrosion Training Program
- Corrosion Control in Petroleum Industries Training program
- Pipeline Corrosion & Integrity Management Training program
- Cathodic Protection for Petroleum Industries Training program
- Asset Integrity Engineering Training
- Process Safety Management Training
- Metallurgy for Non-Metallurgist Training program
- Welding Procedure (WPS/PQR) & Welder Performance Qualification (WPQR) Training
- Welding Inspection / Inspector Training program
- NDT Level II Training & Certification Training program
- Coating Inspection / Inspector Training program
